

measure this box: must be exactly 1.00in x 1.00in
(print at 100% / Actual Size — NOT "Fit to Page")

CRIBBAGE BOARD DRILLING TEMPLATE — for a 1x6 board, 16in long (actual 5.5in x 3/4in)
2-player NESTED continuous track (P1 inner, P2 outer), 121 points each: 120 holes out-and-back + start.
Hole spacing differs slightly by track since they're concentric: 0.260in (inner) to 0.275in (outer) - normal, not an error.
Drill bit: 1/8in (0.125in). Drill depth: 5/16-3/8in (board is 3/4in thick) so pegs seat firmly without poking through.
Both tracks share ONE turn center at the right end and curve around it together, nested like a horseshoe -
follow each track's own arc of holes exactly, don't square either one off.
The two small boxed grids near START are game-won trackers (10 dots each) - drill light index marks or skip them.

Page 2 of 2 — align to page 1 using ALIGN A / ALIGN B marks above, then tape.
